Figure 10.10.10

This figure shows the relationship between the different components of the system. The central figure is a dark, circular shape with a lighter, textured interior, possibly representing a cross-section of a biological or geological specimen.

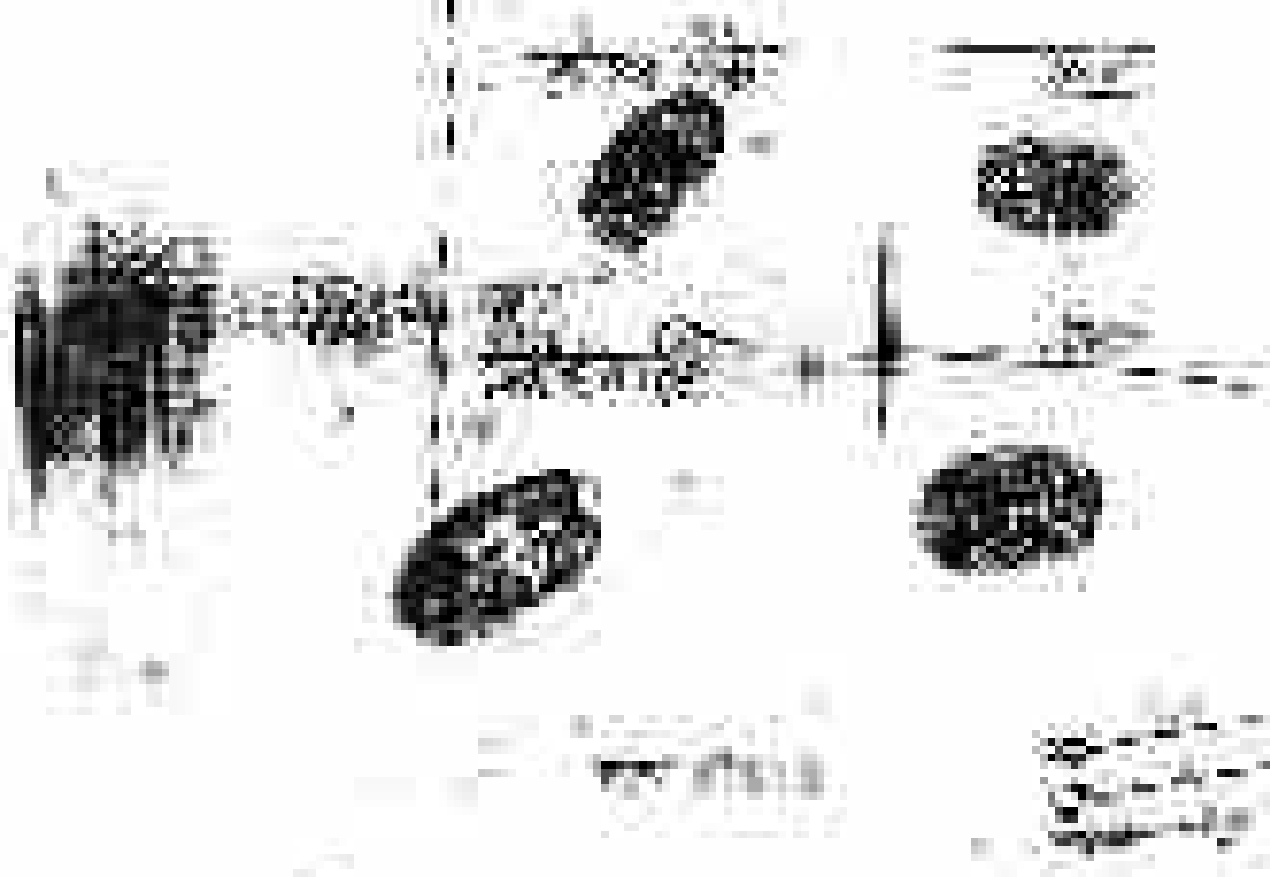

1. The structure is made of reinforced concrete. The concrete is of grade M20 and the steel is of grade Fe250. The structure is designed for a service life of 50 years.

2. The structure is subjected to a uniform load of 10 kN/m² and a point load of 20 kN at the center. The structure is supported by four columns.

3. The structure is designed for a maximum deflection of 10 mm/m. The structure is also designed for a maximum crack width of 0.3 mm.
