1. Identify the raw materials used in the production process.  
 2. Calculate the total cost of raw materials used.  
 3. Determine the manufacturing overheads.  
 4. Compute the total cost of production.

1. **Introduction**  
This document outlines the key findings and recommendations from the recent project review. The primary goal was to assess the current state of operations and identify areas for improvement.

2. **Key Findings**  
The review identified several critical areas for attention, including resource allocation, process efficiency, and communication channels. These findings are detailed in the following sections.

3. **Recommendations**  
Based on the findings, the following recommendations are proposed to enhance overall performance and ensure long-term success.

4. **Implementation Plan**  
A structured implementation plan is required to ensure that the recommended changes are effectively integrated into the existing workflow. This includes setting clear milestones and responsibilities.

5. **Conclusion**  
The project review has provided valuable insights into the current operational challenges and opportunities. It is essential to act on these findings promptly to achieve the organization's strategic objectives.

6. **Next Steps**  
The immediate next steps involve the formation of a task force to oversee the implementation of the recommendations. Regular communication and reporting will be crucial for tracking progress.

7. **Appendix A**  
Detailed data and supporting documents are provided in Appendix A, including a comprehensive list of project milestones and a breakdown of resource requirements.

8. **Appendix B**  
Appendix B contains a detailed financial overview, including budget allocations and projected costs for the implementation phase.

9. **Appendix C**  
Appendix C provides a detailed overview of the organizational structure and the roles of key personnel involved in the project.

10. **Appendix D**  
Appendix D includes a list of external stakeholders and their contact information, along with a summary of their interests in the project.

# COMPUTER SOFFY

Computer software is a collection of instructions that tell the computer what to do.

The computer system consists of hardware and software.

**Hardware** - The physical parts of the computer system that you can touch and see. Examples include the monitor, keyboard, mouse, and printer.

**Software** - The instructions that tell the computer what to do. Examples include word processing programs, spreadsheets, and games.

Computer software is divided into two main categories: **System Software** and **Application Software**. System software includes the operating system, which manages the computer's resources and provides a platform for other software to run. Application software is designed to perform specific tasks, such as word processing or accounting.

Computer software is developed through a process called **software development**. This process involves several stages, including requirements gathering, analysis, design, coding, testing, and deployment.

Computer software is essential for modern society, enabling us to perform tasks that would be difficult or impossible to do manually.

Computer software is constantly evolving, with new technologies and applications being developed all the time. This evolution is driven by the need for more powerful and efficient tools to solve complex problems.

To,

The Chairman/ Director

Sonebhadra (U.P.)

**Sub.: Quotation for Mining Technology & Mining Geology Lab Equipment**

Dear Sir,

With reference to the above subject & your requirement, we are hereby submitting our best offer for the standard quality equipment as below & await your valued order for prompt and best attention at our end. It supercedes our previous offer, if any.

S.No.	Description of Goods	Qty.	Per Unit	Unit Price	Amount
1	Study and identification of important rock forming mineral in the hand specimen.				
	Collection of 10 Rocks Forming Minerals	2	1500	Each	3000.00
2	Study and identification of important rocks in hand specimen.				
	Collection of 50 Rocks	2	2000	Each	4000.00
3	Study and identification of geomorphological models.				
	Geomorphological Models (Set of 8)	1	5500	Set	5500.00
4	Study and identification of important economic minerals in hand-specimen.				
	Collection of 20 Minerals	2	1500	Each	3000.00
5	Study and sketch of model showing different types of faults, folds & their relation to topography.				
a	Fold Models (Set of 8)	1	12000	Set	12000.00
b	Fold Models (Set of 8)	1	12000	Set	12000.00
6	Drawing of cross sections determination of dip strike from geological maps.				
	Dip & Strike Problems (Set of 4 Models)	1	6000	Set	6000.00
	<b>Total</b>				<b>45500.00</b>
	<b>GST @ 18% Approx</b>				<b>8190.00</b>
	<b>Total Value</b>				<b>53690.00</b>

**Terms & Conditions of Supply:**

- Prices quoted are F.O.R. College.
- GST @18% Extra or as applicable per Govt. Rules.
- Delivery period 1- 2 weeks from the date of receipt of confirm order with advance.
- Payment 100% advance against the order before dispatch/ delivery or as mutually agreed.
- Order once placed will not be cancelled in any circumstances.
- Validity of offer 30 days from this date & thereafter subject to our confirmation.
- All transactions are subject to Delhi Jurisdiction.

Thanking you & assuring ours best services & Co-operation.
