1. This is a circle, but not a ring. It is a circle. The center is a point. The radius is a line from the center to the edge. The diameter is a line through the center from one edge to the other. The circumference is the distance around the circle.

2. This is a ring, but not a circle. It is a ring. The center is a point. The inner radius is a line from the center to the inner edge. The outer radius is a line from the center to the outer edge. The thickness is the distance between the inner and outer edges.

3. This is a circle, but not a ring. It is a circle. The center is a point. The radius is a line from the center to the edge. The diameter is a line through the center from one edge to the other. The circumference is the distance around the circle.

4. This is a ring, but not a circle. It is a ring. The center is a point. The inner radius is a line from the center to the inner edge. The outer radius is a line from the center to the outer edge. The thickness is the distance between the inner and outer edges.

5. This is a circle, but not a ring. It is a circle. The center is a point. The radius is a line from the center to the edge. The diameter is a line through the center from one edge to the other. The circumference is the distance around the circle.

6. This is a ring, but not a circle. It is a ring. The center is a point. The inner radius is a line from the center to the inner edge. The outer radius is a line from the center to the outer edge. The thickness is the distance between the inner and outer edges.

7. This is a circle, but not a ring. It is a circle. The center is a point. The radius is a line from the center to the edge. The diameter is a line through the center from one edge to the other. The circumference is the distance around the circle.

8. This is a ring, but not a circle. It is a ring. The center is a point. The inner radius is a line from the center to the inner edge. The outer radius is a line from the center to the outer edge. The thickness is the distance between the inner and outer edges.

9. This is a circle, but not a ring. It is a circle. The center is a point. The radius is a line from the center to the edge. The diameter is a line through the center from one edge to the other. The circumference is the distance around the circle.

10. This is a ring, but not a circle. It is a ring. The center is a point. The inner radius is a line from the center to the inner edge. The outer radius is a line from the center to the outer edge. The thickness is the distance between the inner and outer edges.

Handwritten notes on the left side of the page, including some illegible scribbles and what appears to be the number '10'.
