INTERNAL ASSESSMENT

This assignment is to be submitted to the faculty in the form of a report on the following topics.

Topic:

1. The role of a pharmacist in the community is to provide a safe and effective service to the public. This involves a number of responsibilities, including the dispensing of medicines, the provision of patient education, and the monitoring of drug therapy. The pharmacist also plays a key role in the prevention of drug misuse and the promotion of public health.

2. The pharmacist is also responsible for the safe and effective use of medicines. This involves the provision of patient education, the monitoring of drug therapy, and the prevention of drug misuse.

3. The pharmacist is also responsible for the provision of patient education. This involves the provision of information on the correct use of medicines, the potential side effects of medicines, and the importance of taking medicines as directed.

4. The pharmacist is also responsible for the monitoring of drug therapy. This involves the monitoring of the patient's response to therapy, the identification of any adverse effects, and the adjustment of therapy as necessary.

5. The pharmacist is also responsible for the prevention of drug misuse. This involves the identification of patients at risk of drug misuse, the provision of patient education, and the referral of patients to appropriate services.

6. The pharmacist is also responsible for the promotion of public health. This involves the provision of information on the prevention of disease, the promotion of healthy living, and the identification of patients at risk of disease.

7. The pharmacist is also responsible for the provision of patient education. This involves the provision of information on the correct use of medicines, the potential side effects of medicines, and the importance of taking medicines as directed.

8. The pharmacist is also responsible for the monitoring of drug therapy. This involves the monitoring of the patient's response to therapy, the identification of any adverse effects, and the adjustment of therapy as necessary.

9. The pharmacist is also responsible for the prevention of drug misuse. This involves the identification of patients at risk of drug misuse, the provision of patient education, and the referral of patients to appropriate services.

10. The pharmacist is also responsible for the promotion of public health. This involves the provision of information on the prevention of disease, the promotion of healthy living, and the identification of patients at risk of disease.

11. The pharmacist is also responsible for the provision of patient education. This involves the provision of information on the correct use of medicines, the potential side effects of medicines, and the importance of taking medicines as directed.

12. The pharmacist is also responsible for the monitoring of drug therapy. This involves the monitoring of the patient's response to therapy, the identification of any adverse effects, and the adjustment of therapy as necessary.
