

## Perspective of Engineering Professional Membership

M.K. Varshaney, FISCE, MIPHEI, MIWARS, MIE Lecturer/Civil Engg.  
D.N. Polytechnic

### 1) INTRODUCTION :-

Engg. education is most prime factor for all round evolving of nation in every respect. It seems to be good wealth for creating feasible awareness. It refines manners, social culture movement and adds etiquettes as well for better & better living. Hence provision of enhancing technical opportunity must be the right for individuals. For such cause many new technical institutions are being setup every year to mitigate strength of augmented population rate. In this era rivalry stands everywhere specially either in getting admission/ seeking services of advance levels or setting up any mode of business. As for as looking on another stride, skill in communication through verbal/written or by any mode of expression, has extensive use to have better competence. In day-to-day life innovative adventures are to mug up to get success on any working place. To cope such status knowing of all about is very important which can be maintained by technical background solely. In today's modern engineering professional may be virtually best if essence of membership from various technical societies would be mixed up. Professional societies membership represent with the society to co-ordinate and spread experience and get them share with experts. Reciprocation of ideas with rich experience would consequently refine results which have direct impact on welfare of social service.

### 2) MEMBERSHIP IMPARTING INSTITUTES :-

Institute means the office head quarters established law fully under various societies registration act where all activities like releasing membership's certificate, publishing journals, arrangement of seminars/local centers & funding audit records, are carried over. Other activities include to pursue Govt. for respective welfare & meeting with overseas delegation etc. Various oriented institute incepted into which are serving globally by their elected fellows as member through sprinkling their views in respective fields.

Indian society of Engineers & Technicians, Indian Association of Soil & Water Conservationists, Indian Society of Soil Science, Instrument Society of India, Indian Water Works Association, Institution of Public Health Engineers India, Indian Society of Earthquake Technology, Indian Road Congress, Indian Geo technical Society, Computer Society of India, International Ferro

Cement Society, National Building Congress, Indian Society of Desert Technology, International Society of Rock mechanics, Indian Society of Construction Material & Structure and Indian Association of Consulting Civil Engineers etc. are some nation wide reputed societies which always welcome its members merged in evolving objective. Beside of above there are some another professional bodies like the Institution of Engineers (India), Institution of Electronics & Telecommunication Engineers, Association of Indian Institute of Architects, Institution of values, Indian Institute of Chemical Engineers, Indian Institute of Industrial Engineering, Institute of Town Planners, Institution of Surveyors, Institution of Civil Engineers, Institution of Structural Engineers, Institution of Mechanical Engineers, Institution of Electrical & Electronics Engineers and Aeronautical Society of India etc, are world wide reputed institutes elect its members by conducting exams or by direct on producing analogous insignia.

### 3) OBJECTIVES OF MEMBERSHIP PROVIDING SOCIETIES :-

Salient targets of various societies as well as professional bodies associated with membership are wide spreaded in their convention but prime are to evolve and develop engineering practices in nation for upgrading skills, to advance status of professional, to facilitate interaction among professional experts, to encourage free exchange of innovations, to carry out research, to setup liaison between adroits and entrepreneurs, to organize short term courses, to cultivate fraternal spirit, to work together with overseas for creating better understanding, to hint and help to deservers, and to circulate their periodical published news letter/ journals/bulletions among members for linking up with aims of society. To enable technical modus vivendi, membership facilitating concepts procure solid support.

### 4) MEMBERSHIP :-

Every allegiant should endeavour to seek membership enrouting specified societies like to keep abreast in sea and its ancillary fields, I.W.R.S., I.P.H.E.I. & I.W.W.A. etc. would be on force front.

Margin in relevant field or bearing equivalent qualification, life/annual membership will be judged as associate, associate member, graduate member,

member, fellow, senior fellow, affiliate member and patron member on which news letter/bulletions/journals shall be distributed free and participation in seminars/workshops/conferences shall be possible. Attending on above would give entity/recognition, which would be helpful in enhancing technical ideas directly with veterans. To become member individual society has laid standards regarding subscription structure for various grades as annual/life/patron. Free does not insist criteria if individual has contributed commendable service, will be liable to persist honorary fellowship which is the highest grade of membership.

#### 5) CONCLUSION :-

Enrolling with professional membership commits purvey upto date resource & a highly developed structure which enable to face challenges globally. Membership is perpetual evidence for promoting practical skills and exposure by viewing & sharing thoughts and working methodology as well with experts through participating in conferences usually arranged by society in various manner. To earmark recognition in social behavior, seeking of membership from relevant institute/society seems the best media to upgrade knowledge and interpersonal skills. So every technical allegiant should confined with relevant professional bodies to develop out skirt and in-depth knowledge in respective realm.
