ABSTRACT:

Amyotrophic lateral sclerosis (ALS) is also called as Lou Gehrig's Disease, Maladie de Charcot. It is a progressive, fatal, neurodegenerative disease caused by the degeneration of motor neurons, the nerve cells in the central nervous system that control voluntary muscle movement. The disorder causes muscle weakness and atrophy throughout the body. The present article review Different aspects of the disease with latest treatment and update.

Key word: Neurodegenerative, Glutamet, Transgenic, Xenogenic cell, Neurotrophic
